Solutions & Services OnePager
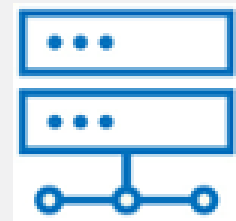

ONST TECH

Private Cloud Infrastructure

With over three decades of expertise designing virtualized infrastructure stacks and agile solutions, we architect private cloud environments tailored to your unique needs. Our approach ensures full control over your data and infrastructure, while leveraging deep industry knowledge to deliver scalable, secure solutions that optimize performance and adapt seamlessly to your evolving requirements.

Hybrid Cloud Solutions

Our hybrid solutions seamlessly integrate on-premises and cloud resources, offering the flexibility to adapt as your business evolves. We collaborate closely with your team to fully understand your requirements and deliver solutions that blend the best of both worlds, maximizing efficiency and minimizing risk.

Data Resilience & Business Continuity

We ensure your data is resilient and always available through robust backup, recovery, and data protection strategies. By thoroughly assessing your environment, we deliver solutions that not only guard against data loss but also enhance the reliability and continuity of your operations.

InfoSec Solutions

ONST provides comprehensive cybersecurity solutions that adhere to the highest standards of compliance and security standards. Leveraging the NIST framework, we conduct full security stack assessments and provide tailored recommendations to secure both your logical and physical environments.

Professional Services & Continuous Support

Our relationship extends beyond the sale, offering professional implementation and providing ongoing support to guarantee deployment and utilization of your solutions are fully realized. We aim to make sure your investment translates into real results, and our commitment to partnership ensures we remain an extension of your team every step of the way.
